

Kaspars Bariss

Eternal technology, or retro technology

Everything I remember,

Childhood, games and more,

I have old computer equipment

Which cannot be connected to modern drives.

Basic input/output system,

Be careful with settings!

Do not change if not necessary

And do not touch hard drives!

Energy Star, Phoenix and HP Vectra

Intel Pentium 2 and 400 – 500 megahertz

The latest Luxor will not work

And new CDs.

Computer, floppy disks, discs and cassettes

“Sega”, “Nintendo” and “PlayStation”,

Movies, music and fairy tales,

Will help you remember this.

Wish: may you keep retro computers!
